PROFESSIONAL SUMMARY

AI Software Engineer with 2+ years of experience at Amdocs delivering enterprise telecom applications and GenAI-powered automation. Skilled in Java, Python, REST APIs and SQL, with hands-on experience building LLM and NLP driven workflows using LangChain, LangGraph, AutoGen and Model Context Protocol (MCP), RAG and LoRA fine-tuning of local LLMs. Delivered Order Management System (OMS) customizations, CRM integrations and Microsoft Entra ID (OAuth2/OIDC) authentication, and built an Excel-driven order automation tool that sharply reduced manual UAT and regression effort. Promoted twice in two years for ownership, rapid learning and cross-team collaboration.

PROFESSIONAL EXPERIENCE

Amdocs

Pune, India | Jun 2024 – Present

AI Software Engineer — **Sep 2026 – Present**

- Design and build GenAI solutions using LangChain and LangGraph to orchestrate multi-step, agentic workflows that automate telecom order processing, validation and test execution.
- Apply LLM and NLP techniques to interpret natural-language business scenarios and convert them into executable API request flows, reducing the manual effort required to author and maintain test scenarios.
- Built a local RAG document chatbot (LlamaIndex, Streamlit, Ollama) with hybrid BM25 + vector search, Reciprocal Rank Fusion, cross-encoder re-ranking, page-level citations and Hit@k / MRR evaluation.

Software Developer — **Jan 2026 – Aug 2026**

- Designed and implemented the Telecom Order Tool – an Excel-driven automation framework integrated with Cursor MCP to execute end-to-end telecom flows (create order, change plan/device, SIM/MSISDN change, recharge) against CRM/OMS REST APIs, reduced manual UAT and regression effort by 70%.
- Developed and maintained Java-based customizations for the Order Management System (OMS), covering product configuration, business validations and REST integrations with ordering services.
- Participated in the full SDLC within Agile sprints – requirements analysis, design, development, code review and testing – using Perforce and Jira.
- Fine-tuned Mistral with LoRA (Hugging Face Transformers, PEFT) on CPU to generate Create Order request JSON and built prompt-tuned Llama3 Ollama models for UPC requests with an automated test harness.

Software Engineering Associate — **Jun 2024 – Dec 2025**

- Configured and integrated Microsoft Entra ID for secure authentication across web and Java desktop applications using OAuth2 and OpenID Connect.
- Delivered production and deployment fixes within tight timelines, accelerated defect closure by 2 days per sprint and stable releases across 4-week release cycles.
- Collaborated with application and third-party teams to meet technical requirements; used Perforce for version control and Jira for defect tracking.
- Promoted to Software Developer (Jan 2026) and to AI Software Engineer (Sep 2026) for consistent delivery and ownership of OMS and automation deliverables.

TECHNICAL SKILLS

AI / GenAI: LLMs, Prompt Engineering, NLP, LangChain, LangGraph, AutoGen, Model Context Protocol (MCP), Retrieval-Augmented Generation (RAG), Machine Learning, LlamaIndex, Hybrid Search, LLM Fine-Tuning (LoRA, PEFT), Ollama

Programming: Java, Spring Boot, Python, SQL (MySQL)

APIs & Integration: Microservices, REST APIs, JSON/XML, OAuth2 & OpenID Connect, Microsoft Entra ID, CRM/OMS integration

DevOps, Cloud & Containers: Perforce, Docker, Kubernetes, Maven, Jenkins, SonarQube, Nexus, CI/CD, GitHub

Tools & Methods: Cursor (AI IDE), GitHub-Copilot, Jira, Beyond Compare, Agile (Scrum), SDLC, Unit / Regression / UAT testing

EDUCATION

Visvesvaraya National Institute of Technology (VNIT), Nagpur — **2020 – 2024**

Bachelor of Technology, Electronics and Communication Engineering | **CGPA: 8.98 / 10**

STRENGTHS

Ownership & Accountability | Analytical Problem Solving | Quick Learner | Adaptability | Team Collaboration
